Hello everyone
Nature is mother, Nature is power
Nature is the life force, It's the basis of life.
Change in Nature is the door to destruction.
This statement is true, not an exaggeration.

In the Present era, we experienced and live this feeling. The wrath of nature has manifested itself during the entire period of the corona pandemic. We humans become helpless.

The plane of man's omnipotence was shattered in a moment.

Corona pandemic encaged every person in their houses like a bird.

The darkness of negativity was spread all around. We experienced a struggle for existence. In this darkness, the human race faces the danger of extinction. Inspiration was a ray of positivity.

Everyone extended a helping hand. Once again the sun of hope kept flying in the path of motivation and enthusiasm.

In this difficult period, volunteers of We Wish For Society kept the torch of social consciousness and awareness alive. We had the zeal to survive.

Good luck and Best wishes. Warm regards

From The President

Dr. Rakesh Tailang

Forget the past,

The session 2020-21 was a time of global disaster. Although we had instinct which was found in the previous session itself, but the horror would be so formidable, it was not even imagined.

Calamity taught and also showed many facts to whole world, from a Nation to smallest unit which is human, learned that happiness-sadness, feeling-absence, glory-disappointment and problem-solution has similar paths. All humanitarian sensibilities flows in the same direction, which begins and are destined with as much as possible service. "We Wish For" family perceive to understand their concerns through service, dedication and Volunteers discharging their services in the same direction.

This year tend to find the path of light in the darkness. It's the period to explore new possibilities in the direction of health, society, education and interpersonal relations. This is the duration for refinement of moral and human values.

Perfectly stated that its crucial time but we must explore innovation. Our curiosity is only the reason of our healthy survival.

Now the mist has dissipate. It is the year of being goal-Oriented. "We Wish For" is determined to forget the past and move ahead. We are re-energizing and focusing on the upcoming projects with integrated action plans.

We are confident that through organization of youth power, investment in the larger interest of power accumulation, comprehensive and in-depth field evaluation of works, follow up and feedback, we will be able to achieve multidimensional reform in our region gradually.

Our Girl Power will be successful in dangerous circles through their

strength, weakness, potential. "We wish for" will be able to invest her power in best works.

Good luck:
